Electric Vehicles

Charging your Electric Vehicle

Charging your electric vehicle at home has never made more \$ense. Freeborn Mower Electric Cooperative offers you multiple Electric Vehicle charging rate designs. We let you decide what makes \$ense for you.

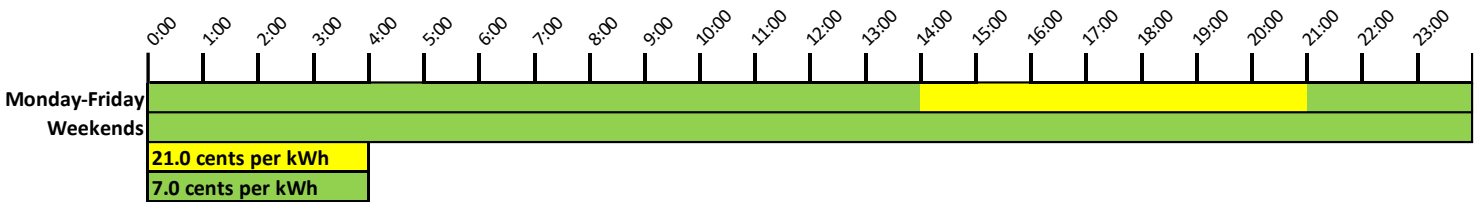

TIME-OF-USE RATE

While participating on the Time-of-use Electric Vehicle charging rate, you have the ability to charge your vehicle whenever you need to. A meter is installed that allows the rate to change based on the time of day you charge your electric vehicle.

On-Peak Rate – 21 cents per kWh, 2pm. – 9pm. Weekdays

Off-Peak Rate – 7 cents per kWh, all other times not defined above

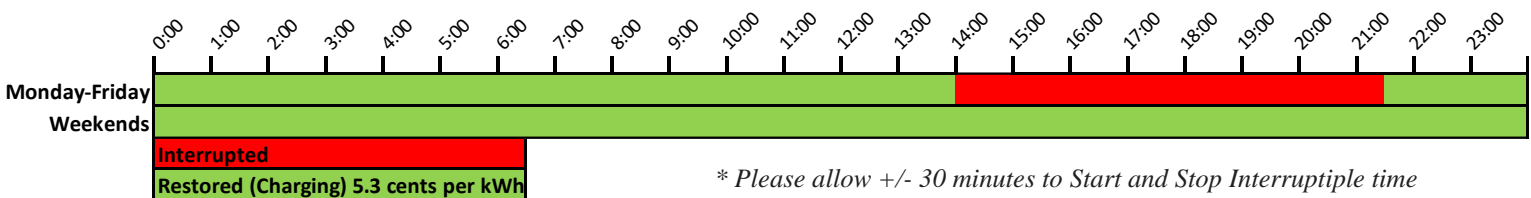

INTERRUPTIBLE RATE

While charging on this rate, enjoy a low energy charge of **5.3 cents per kWh**. Like the Time-of-Use rate, the Interruptible rate requires a meter to be installed. This meter will control the start and stop times of the interruptible periods. Interrupted weekdays from 2pm – 9:30 pm*

Energy Charge – 5.3 cents per kWh

* Please allow +/- 30 minutes to Start and Stop Interruptible time

Evergreen Everywhere:
Members who charge an electric vehicle during off-peak hours can receive up to four **Evergreen** blocks.
